Employment History

Web developer freelance , Tel-Aviv, Israel

AUGUST 2023 — PRESENT

As a freelance web designer and developer, I utilize a diverse set of skills and methods to craft functional web pages. My toolkit includes a mastery of Webflow platform, allowing me to transform ideas into visually stunning and responsive online experiences, among other skills and methods

Programmer , Beecomm, Tel-Aviv, Israel

MAY 2022 — AUGUST 2023

In my previous role, I was responsible for the design and development of web applications using React and Node.js. This included problem-solving, maintaining, and adding new features in alignment with the client's specific requirements. I also utilized Visual Basic and SQL in combination with the Microsoft Access database to ensure smooth and efficient data management. Additionally, I played a key role in enhancing client satisfaction by actively participating in software updates and improvements.

Military Service, IDF

MARCH 2013 — MARCH 2016

Served three years in the IDF as a combat soldier in NAHAL unit, 931 regiment.

Self Projects

Nutritionist Portfolio - A comprehensive platform designed to empower my nutritionist client and improve his connection with clients on their wellness journey.

Face Detection App – This full-stack web project was a thrilling challenge for me, as it introduced new technologies into my skillset. It combines React and Node.js with MongoDB, using the Clarifai API to detect faces in images.
